Design Standards

Cohesive, Scalable, and Power BI-Ready UI for Ongoing Use Cases

July 2025

Design Standards: Summary

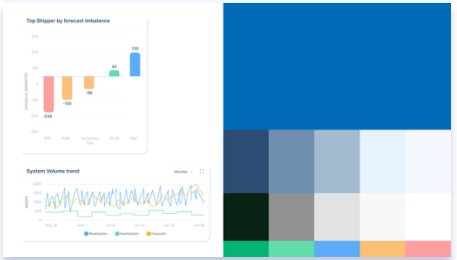
By applying consistent use case logos, a unified color palette, cohesive typography, standardized iconography, and reusable UX patterns, this design standards ensures scalable, recognizable, and user-friendly experiences across use cases

Use Case Logos

Unified identity across use-cases using the Pertamina base logo

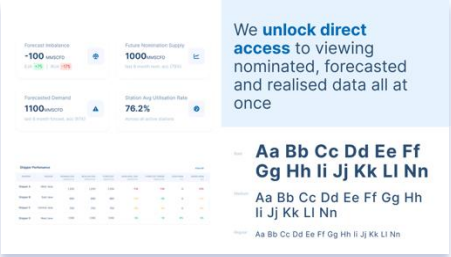
Color Palette

Derived from Pertamina's core colors, with new shades to create distinction



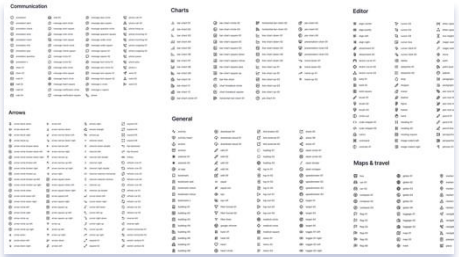
Typography

Clean, modern, and optimized typography for Power BI pages and data visualisations



Iconography

Minimalist, clean, intuitive and scale-friendly iconography for Power BI and data visualisations



UX Patterns

Consistent navigation structure with adaptable title/control bars and breadcrumb navigation mechanism

Consistent and modular identity across use cases

A flexible identify style that gives each use case a distinct look while staying visually aligned with Pertamina brand family

Built on a shared structure, it ensures brand recognition, consistency, and easy scalability.

We’ve used **Futura** to match the Digital Hub logo and maintain visual coherence across all logos

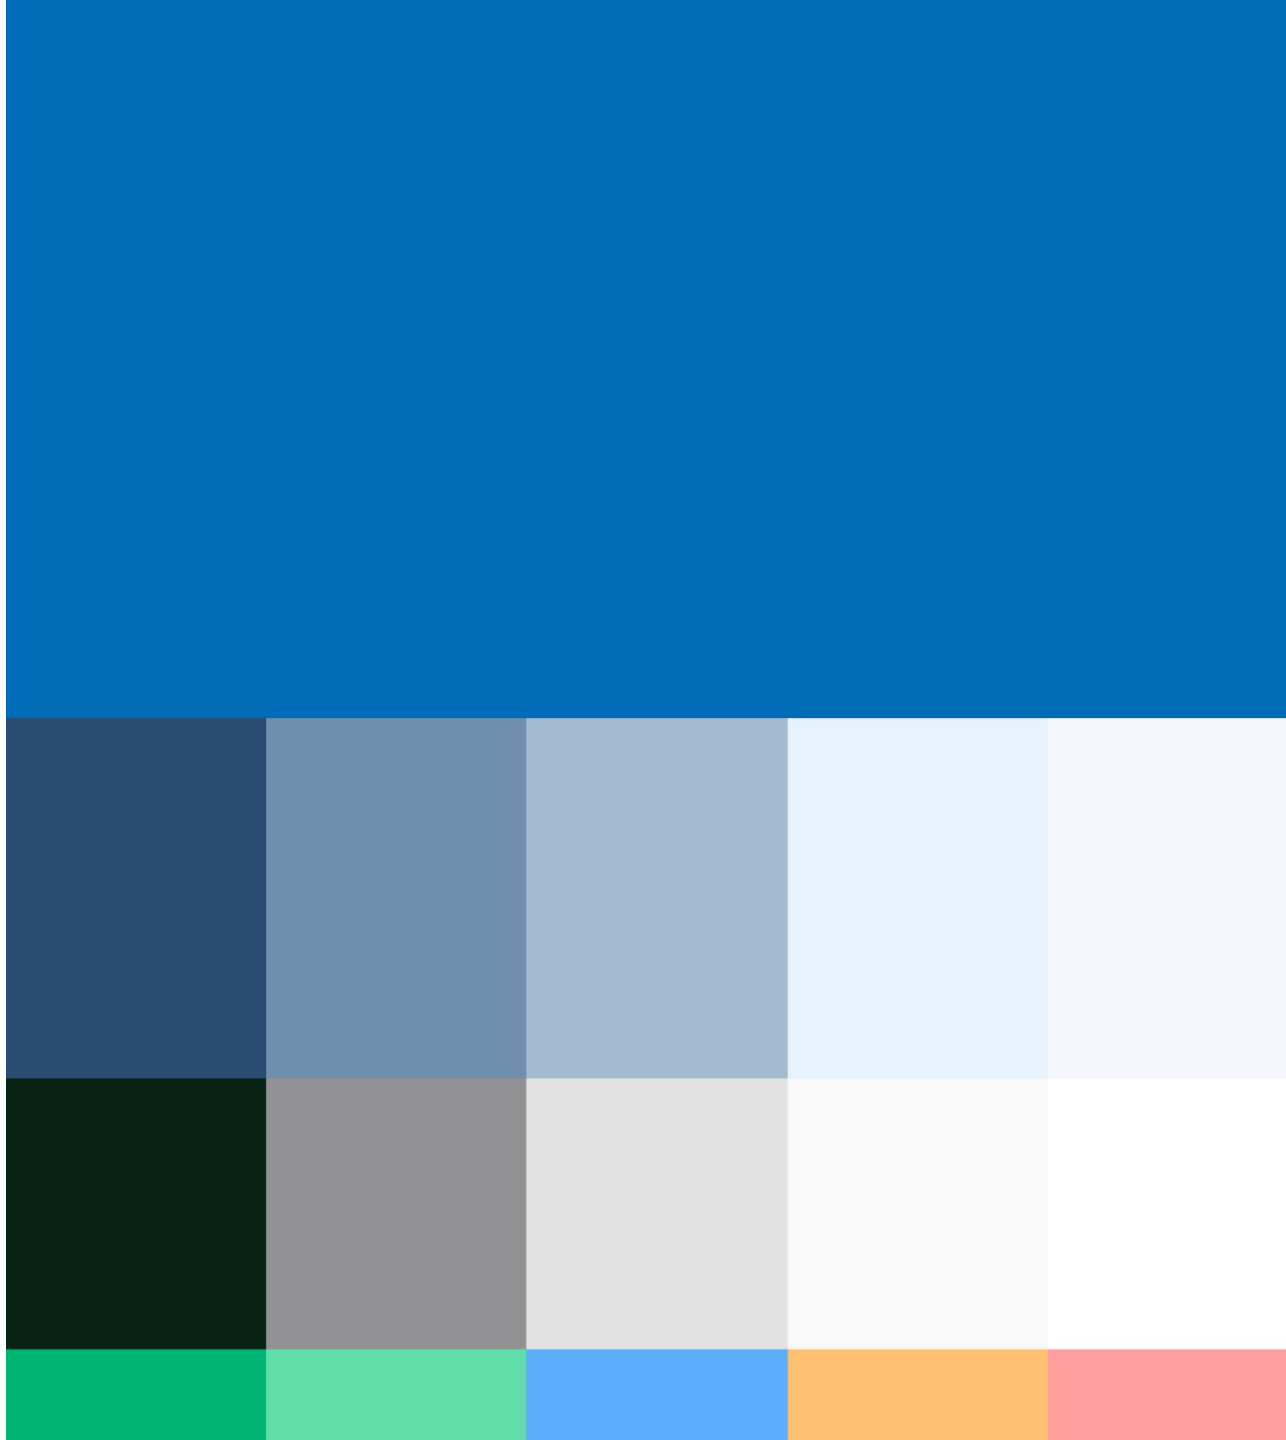
Familiar and functional color system

The color palette builds on Pertamina's core brand colors, expanding them into a more interface-friendly and accessible set for use across platforms

Focused on clarity and consistency, this system introduces new shades—especially within the blue spectrum—to support differentiation across use cases while maintaining consistency

Reference: Pertamina Brand Guide



Modern and accessible typography

Inter is a modern, legible typeface optimized for digital use—balancing clarity, readability, and visual consistency across sizes and layouts

Available as a Google Web Font, it can be uploaded as a custom font in Power BI, enabling seamless alignment across dashboards and interfaces with minimal effort

We **unlock direct access** to viewing nominated, forecasted and realised data all at once

Bold

Medium

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Nn

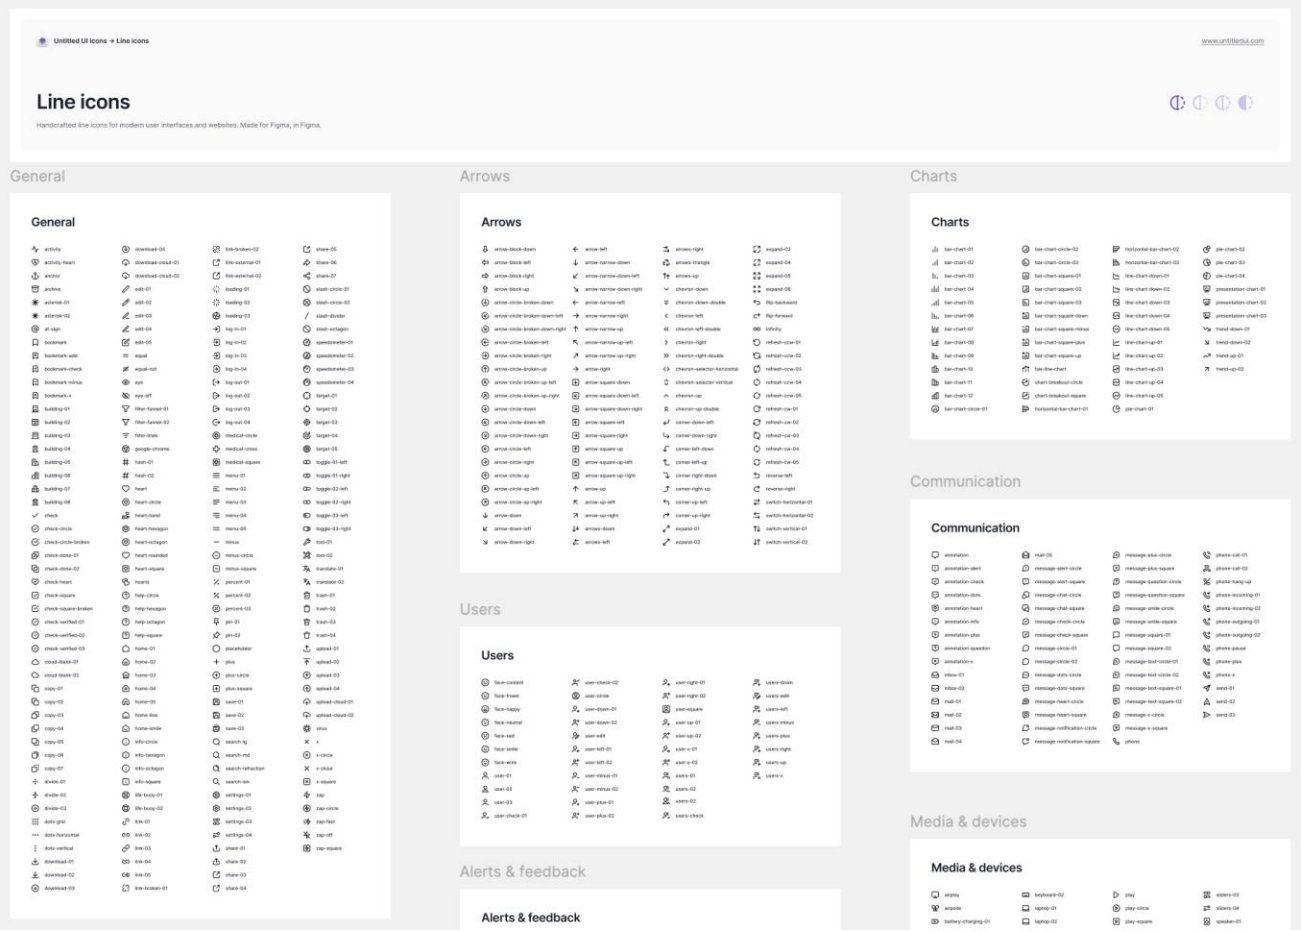
Regular

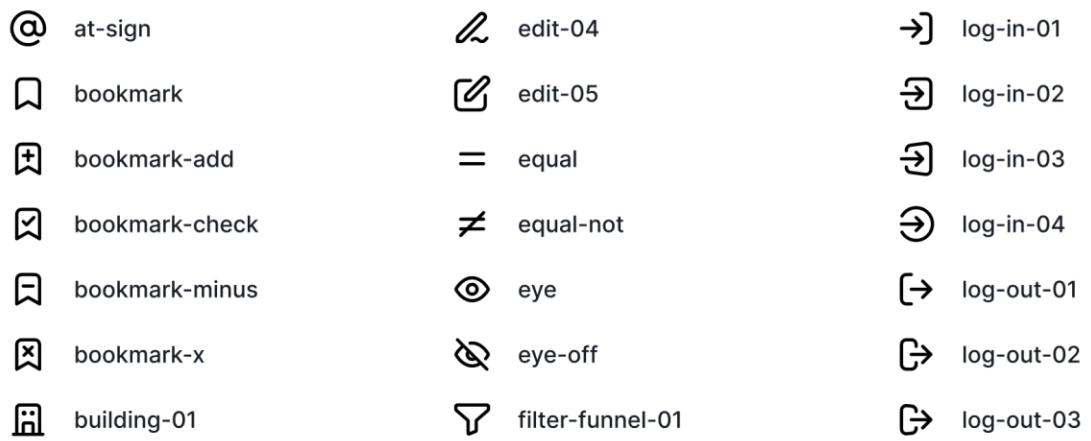
Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Nn

Consistent and scalable iconography

A clean, lightweight and outlined icon style for performance and adaptable across themes and backgrounds

Built on a widely-used, open-source library ensures a visual consistency while allowing room for future scale



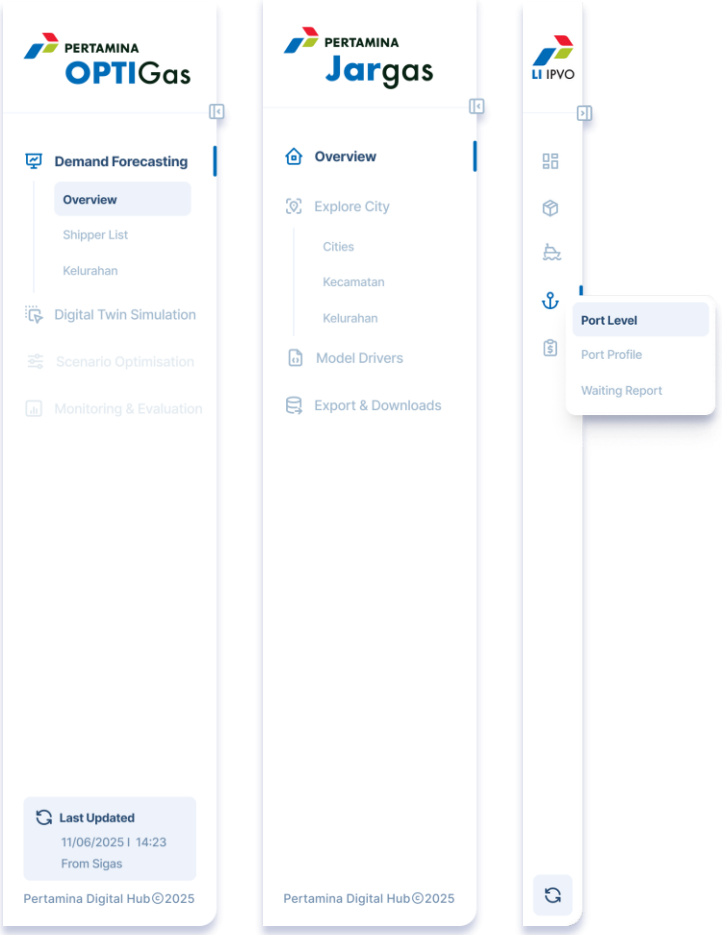


Flexible persistent navigation system design

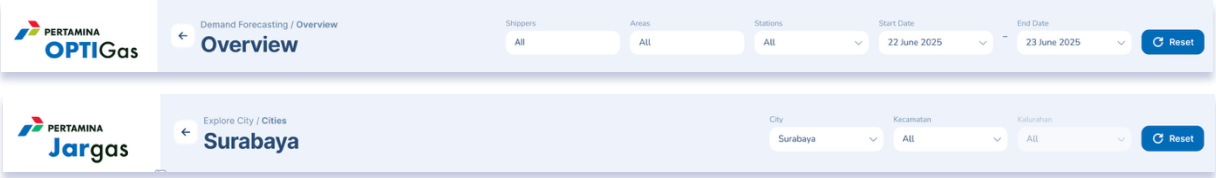
A modular, scalable, and context-aware navigation system supports consistency across platforms while adapting to specific needs

- **Left Navigation bar:** Teams can choose to use either the **expanded** or **collapsed** navigation view based on their use case needs — or both, if the experience requires it.
  However, due to **Power BI limitations**, it's recommended to pick **one primary layout** to ensure consistency and avoid complexity in implementation.
- **Top bar**: Customizable per use case with filters, key actions, and breadcrumbs for clarity

Left navigation bar (expanded and collapsed view)

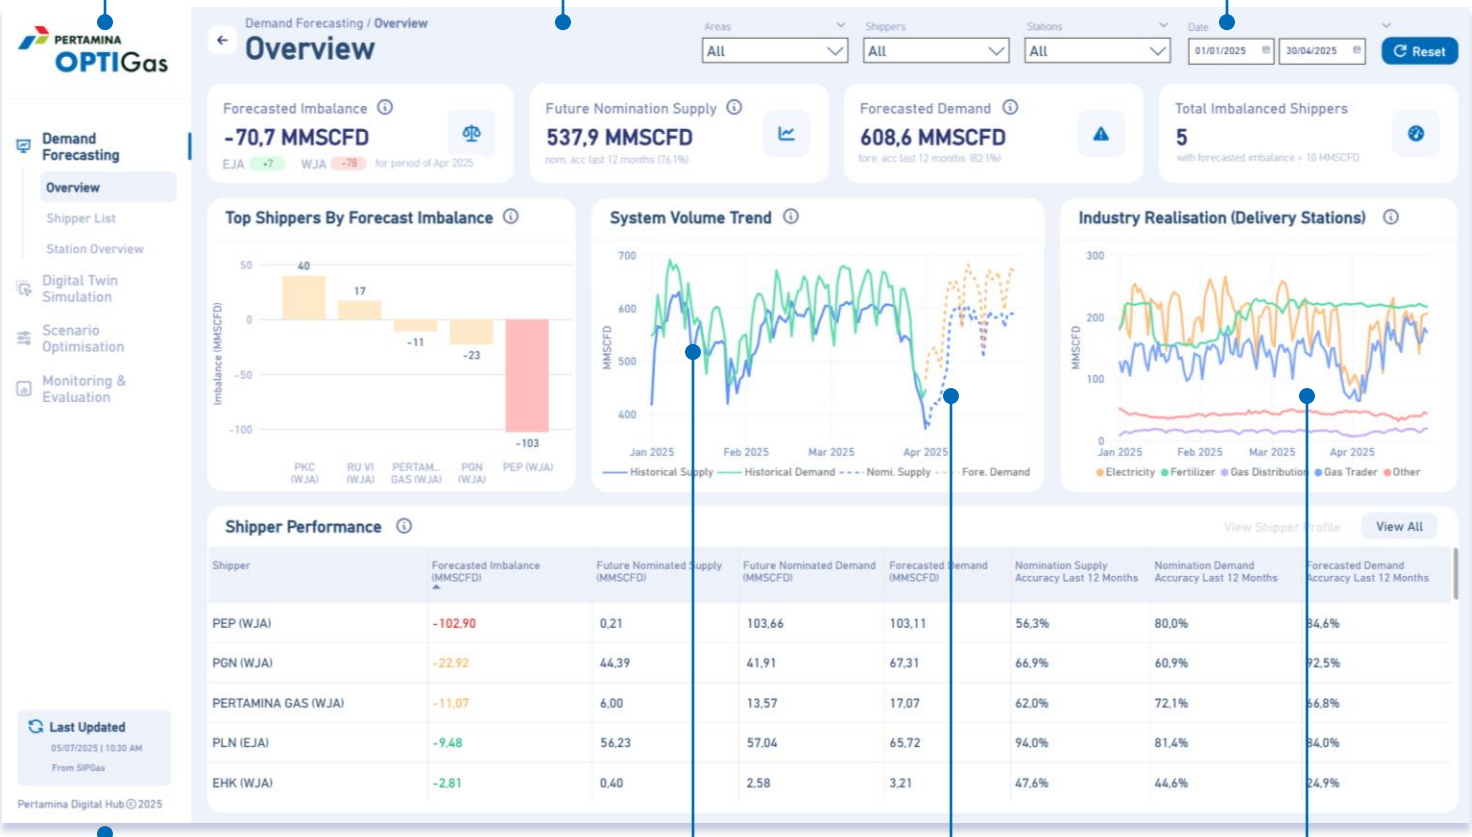


Top bar



Bringing It All Together in Power BI

This screen shows how the **OPTIgas** use case brings our design standard to life — **built entirely within Power BI** using standardized components, styles, and layouts for consistency and scalability.



Consistent logo placement

Clear back & breadcrumb path

Unified filter position

Modular Navigation

Reusable card components

Standardized Color scheme

Unified chart styling
